Ecological awareness.

Unified by the pursuit of clean water and energy.

Trânsito art supports understandings of multi-layered nuances within technological and climate transitions. Inviting reflection has generative and humbling social effects in developing upon clear communication. The cooperation of billions of lives and micro decisions has the capacity to mitigate polarisation by integrating art into branding to inspire curiosity and awe while addressing data impacting intricate ecosystems.

Adding value & vitality.

Luxurious serenity for all.

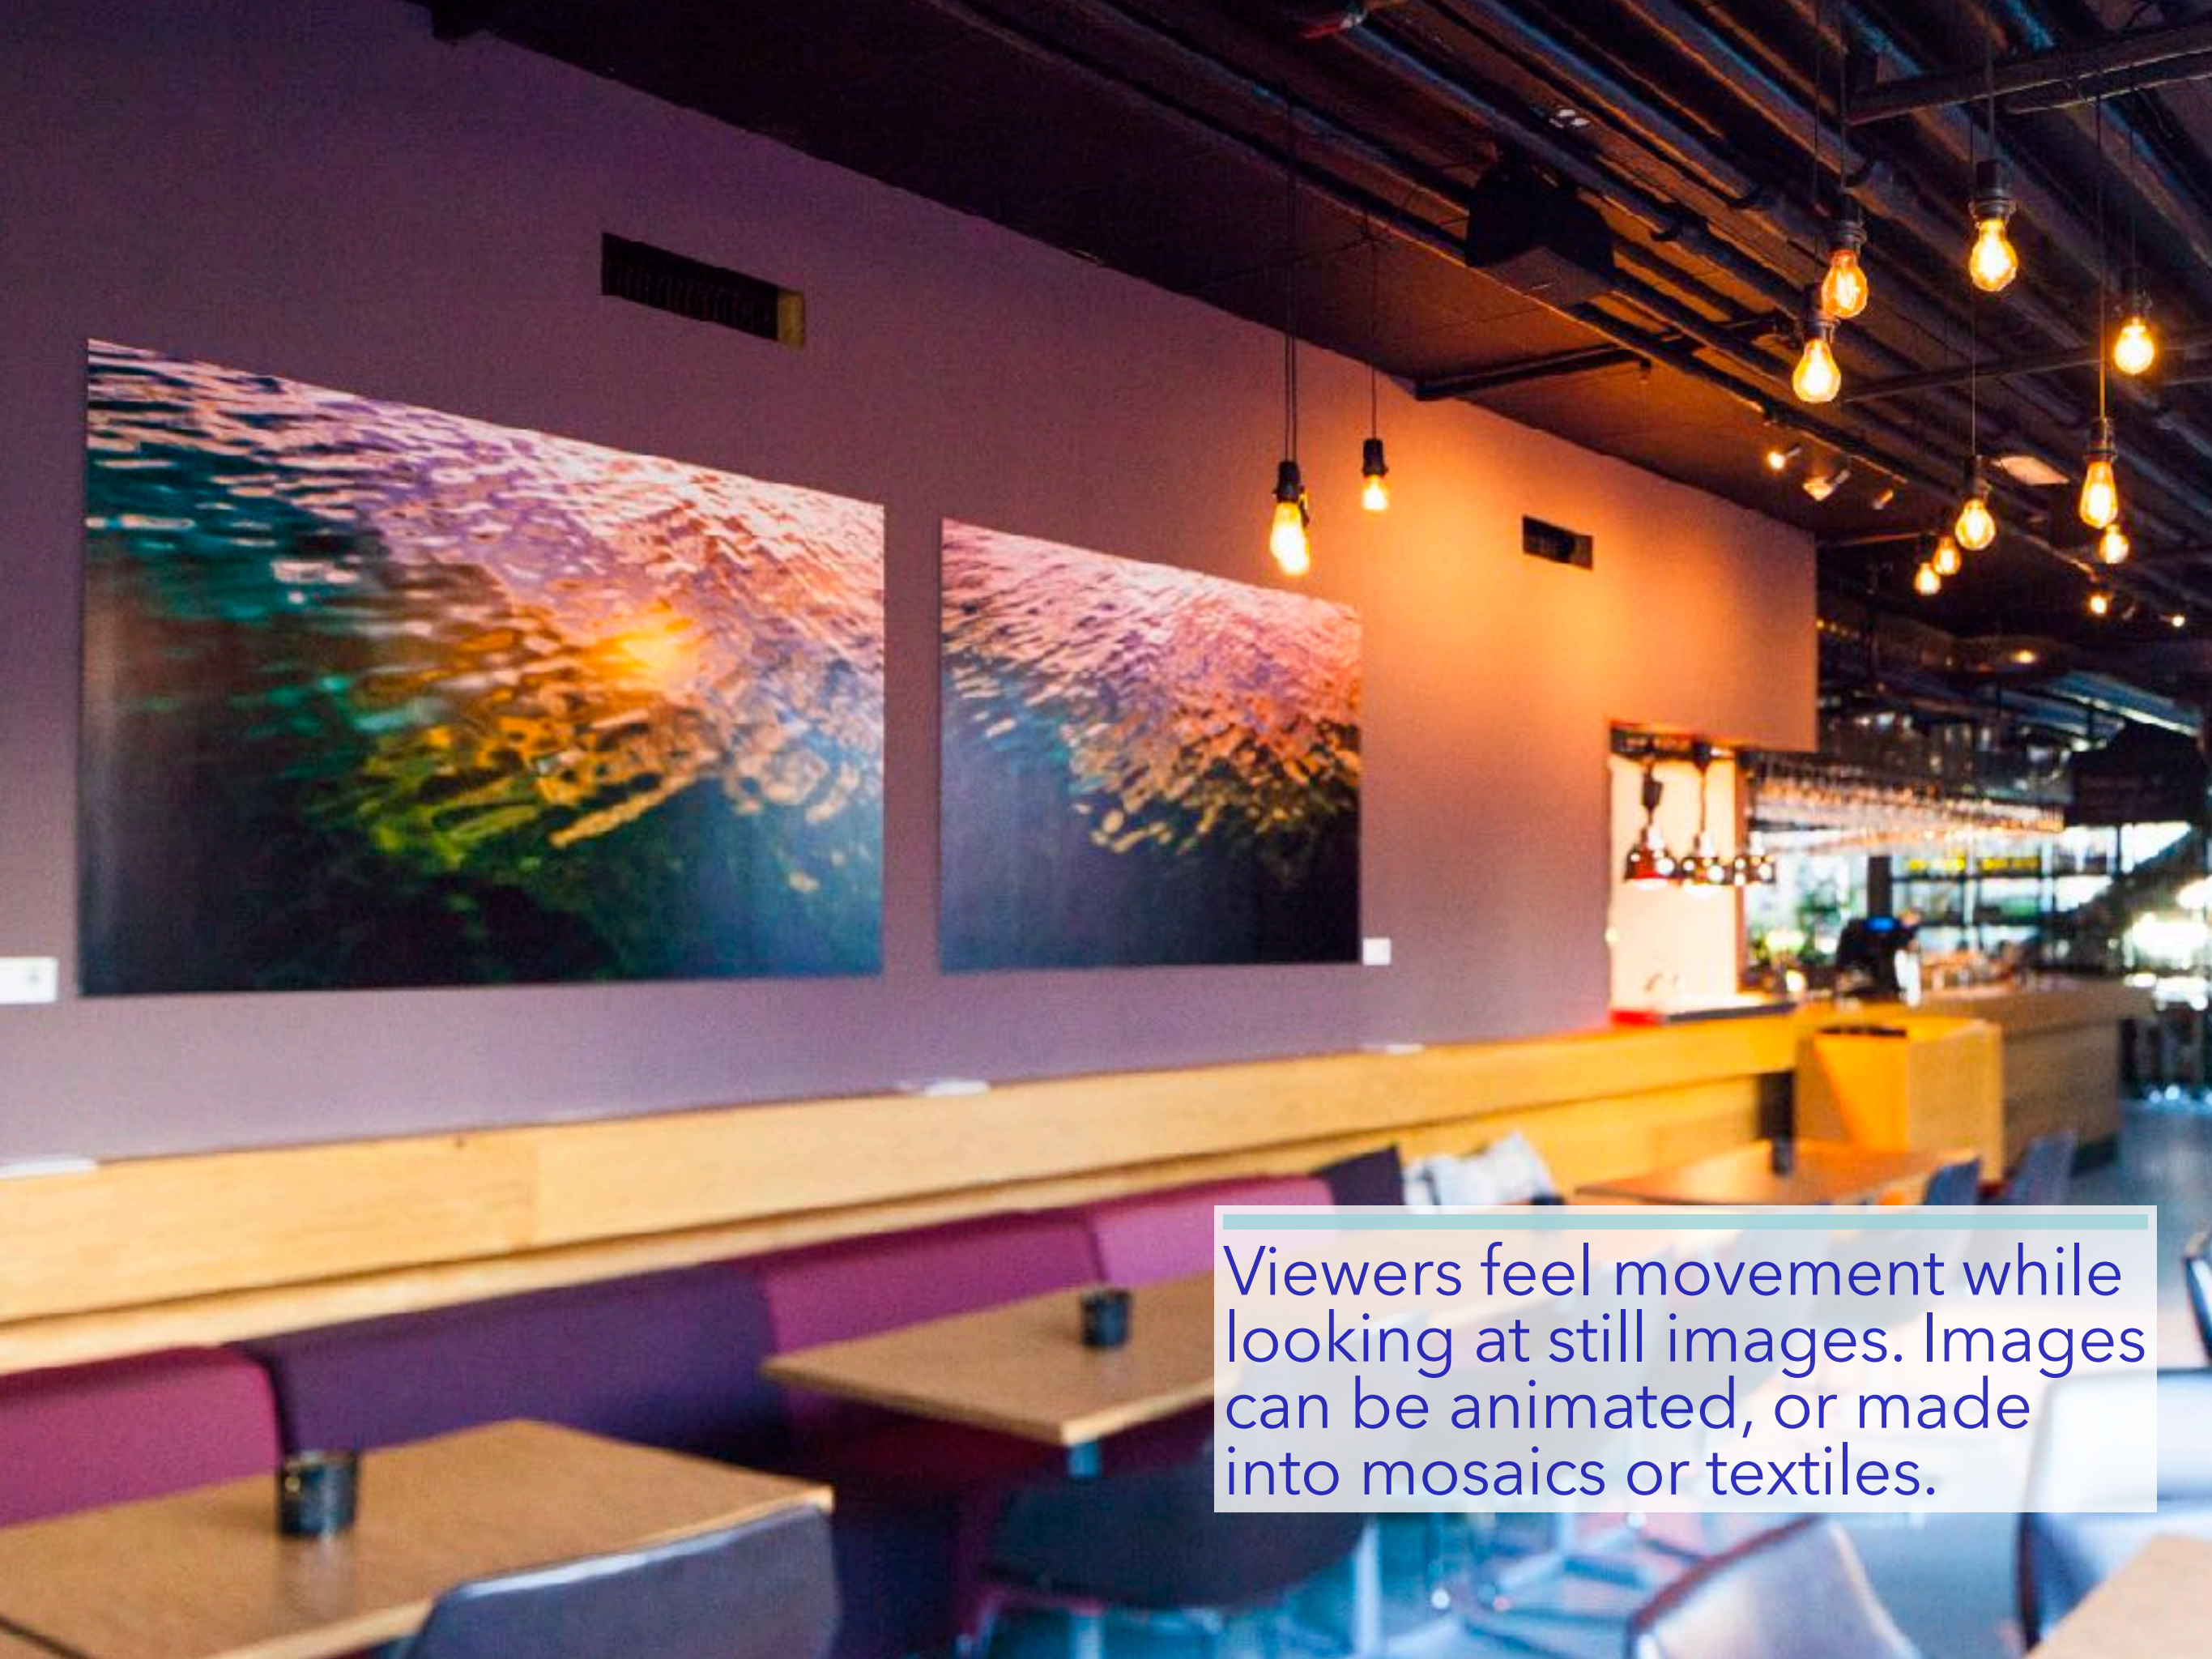

Artwork adds renewed vitality to working and living spaces. Trânsito art makes the meaning of transition applicable to being transformed into use on interiors and building facades, work and free time activity products, communication materials, while enlivening engaging fact-based stories on the realities of industrial innovation through technological advances. Sparking the humble and hardworking core of Norwegian ethics, Trânsito infuses the daily ritual of living and working for a harmonious and cooperative future with a fresh vision of quiet beauty. By enhancing a shared sense of remembering and feeling, Trânsito offers a vision worthy of working for, together.

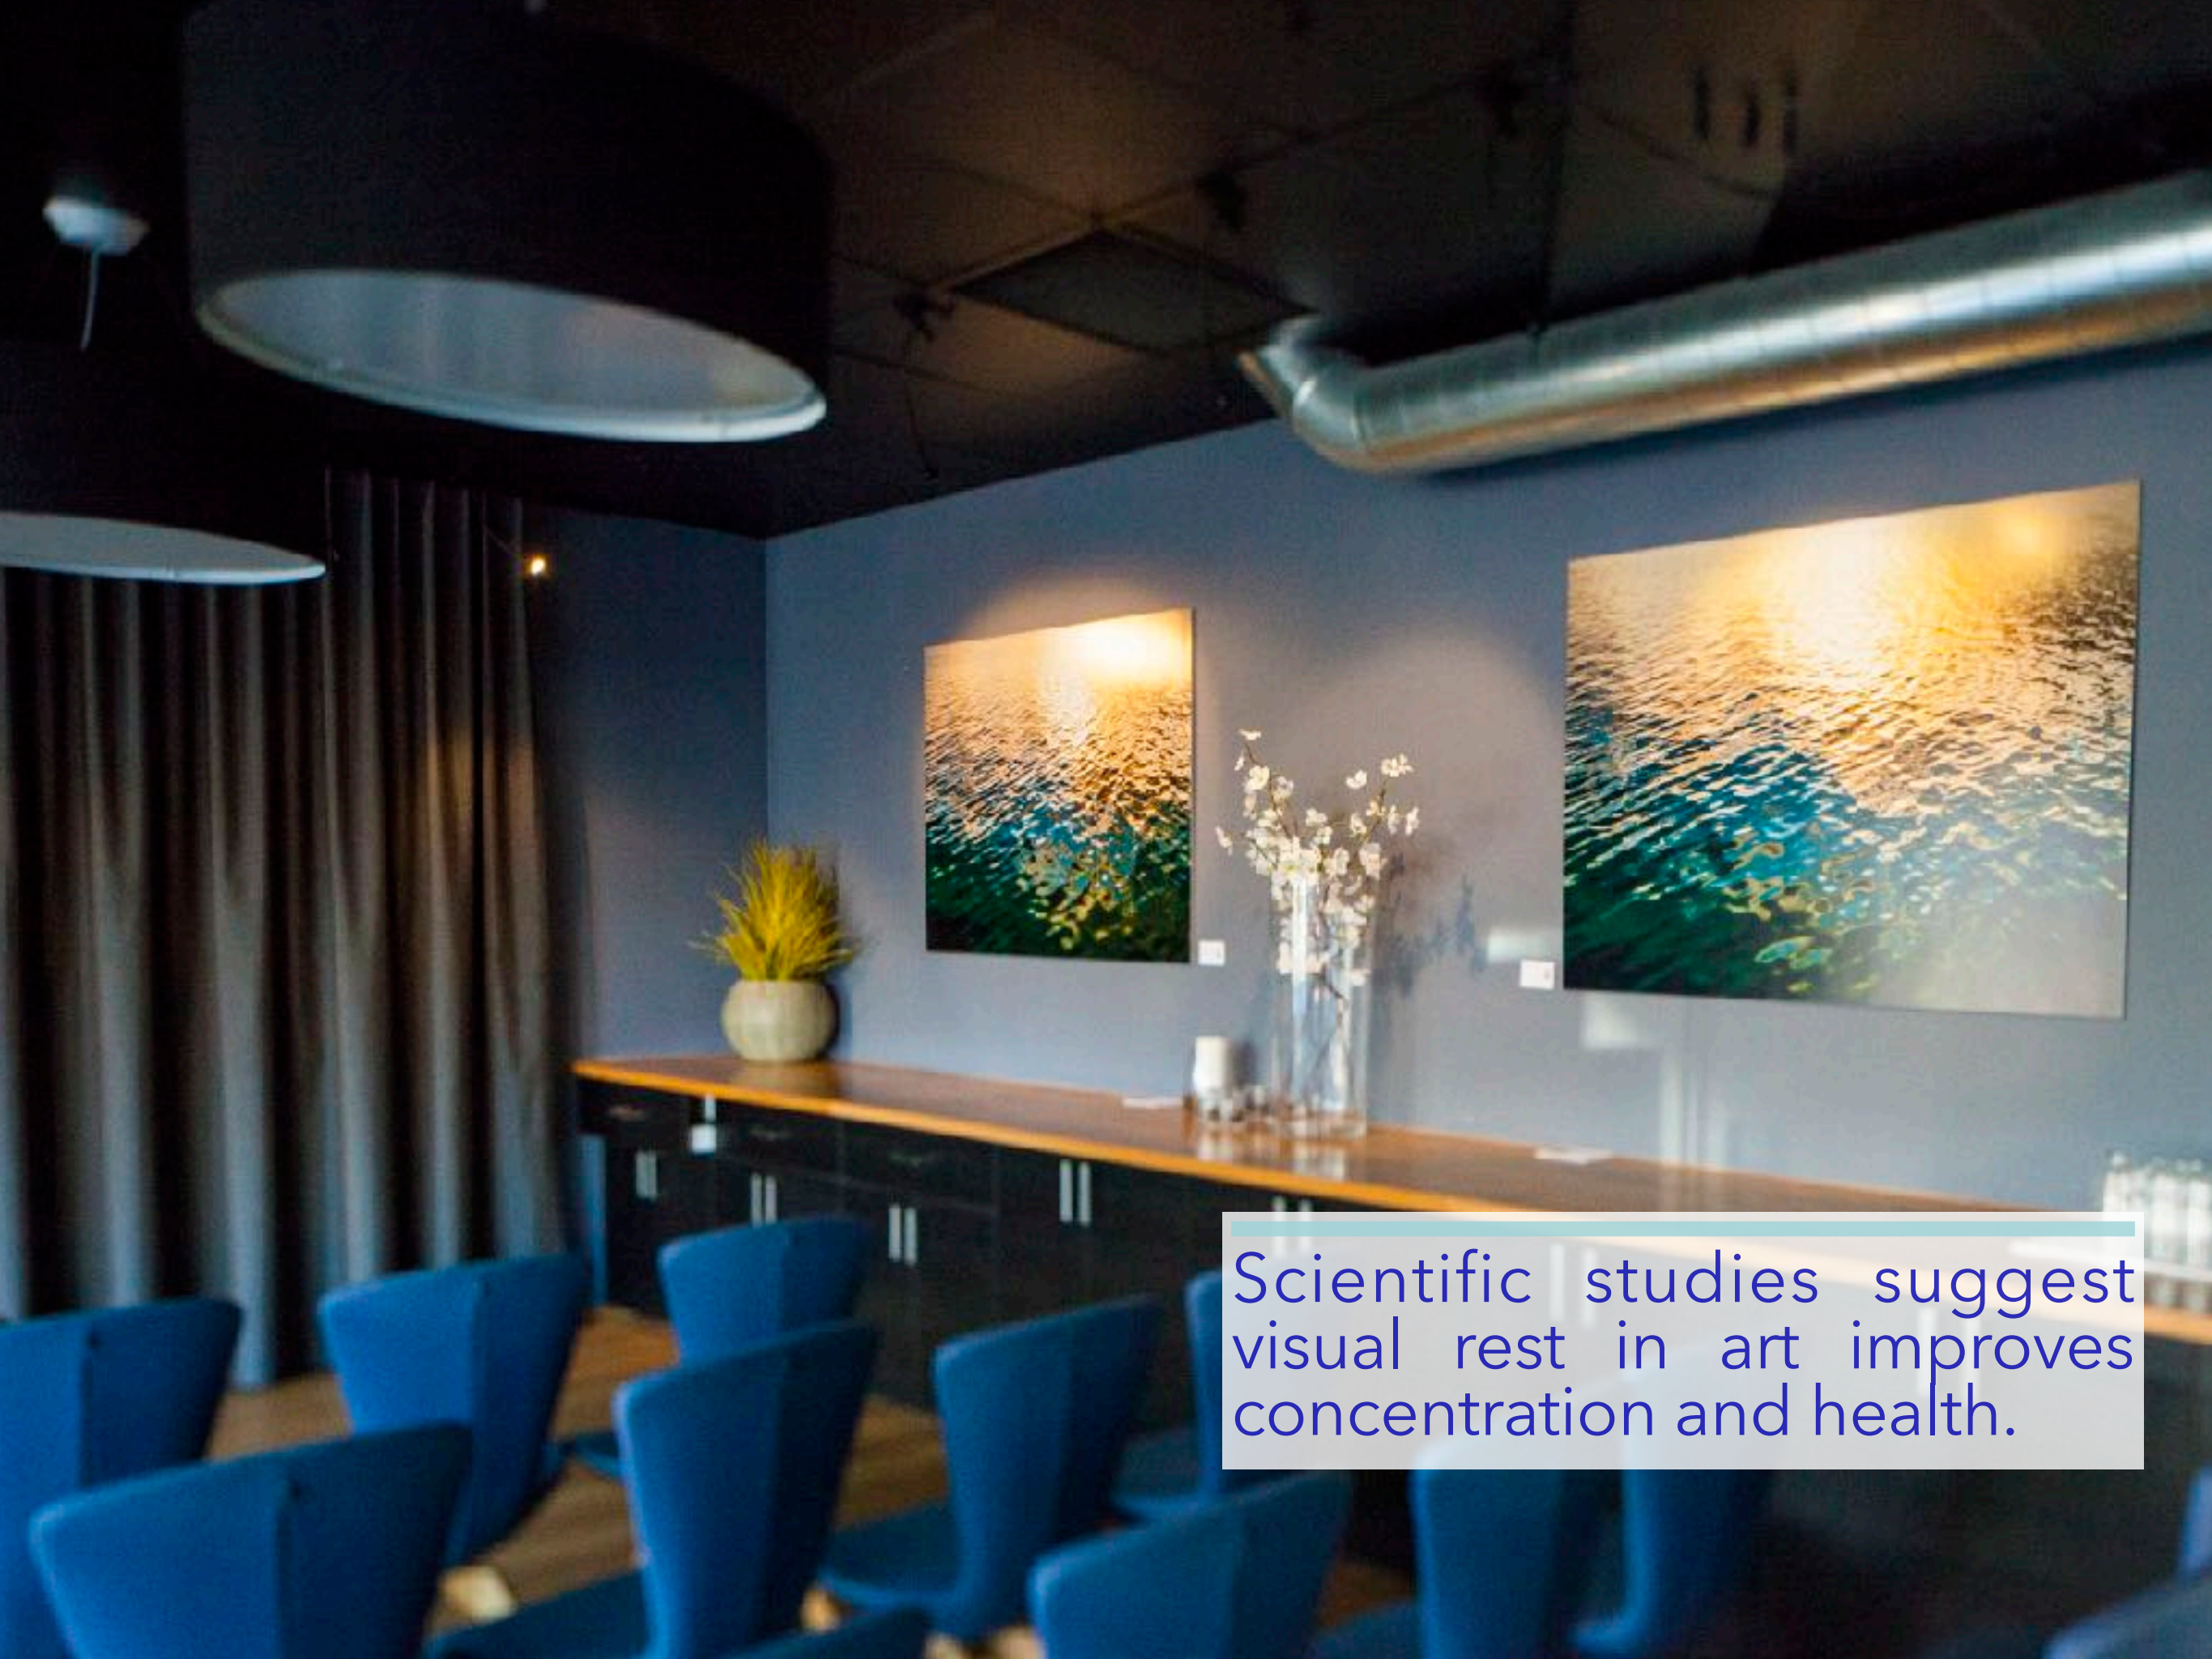

Depth in surfaces.

The language of color uniquely touches the spirit each person.

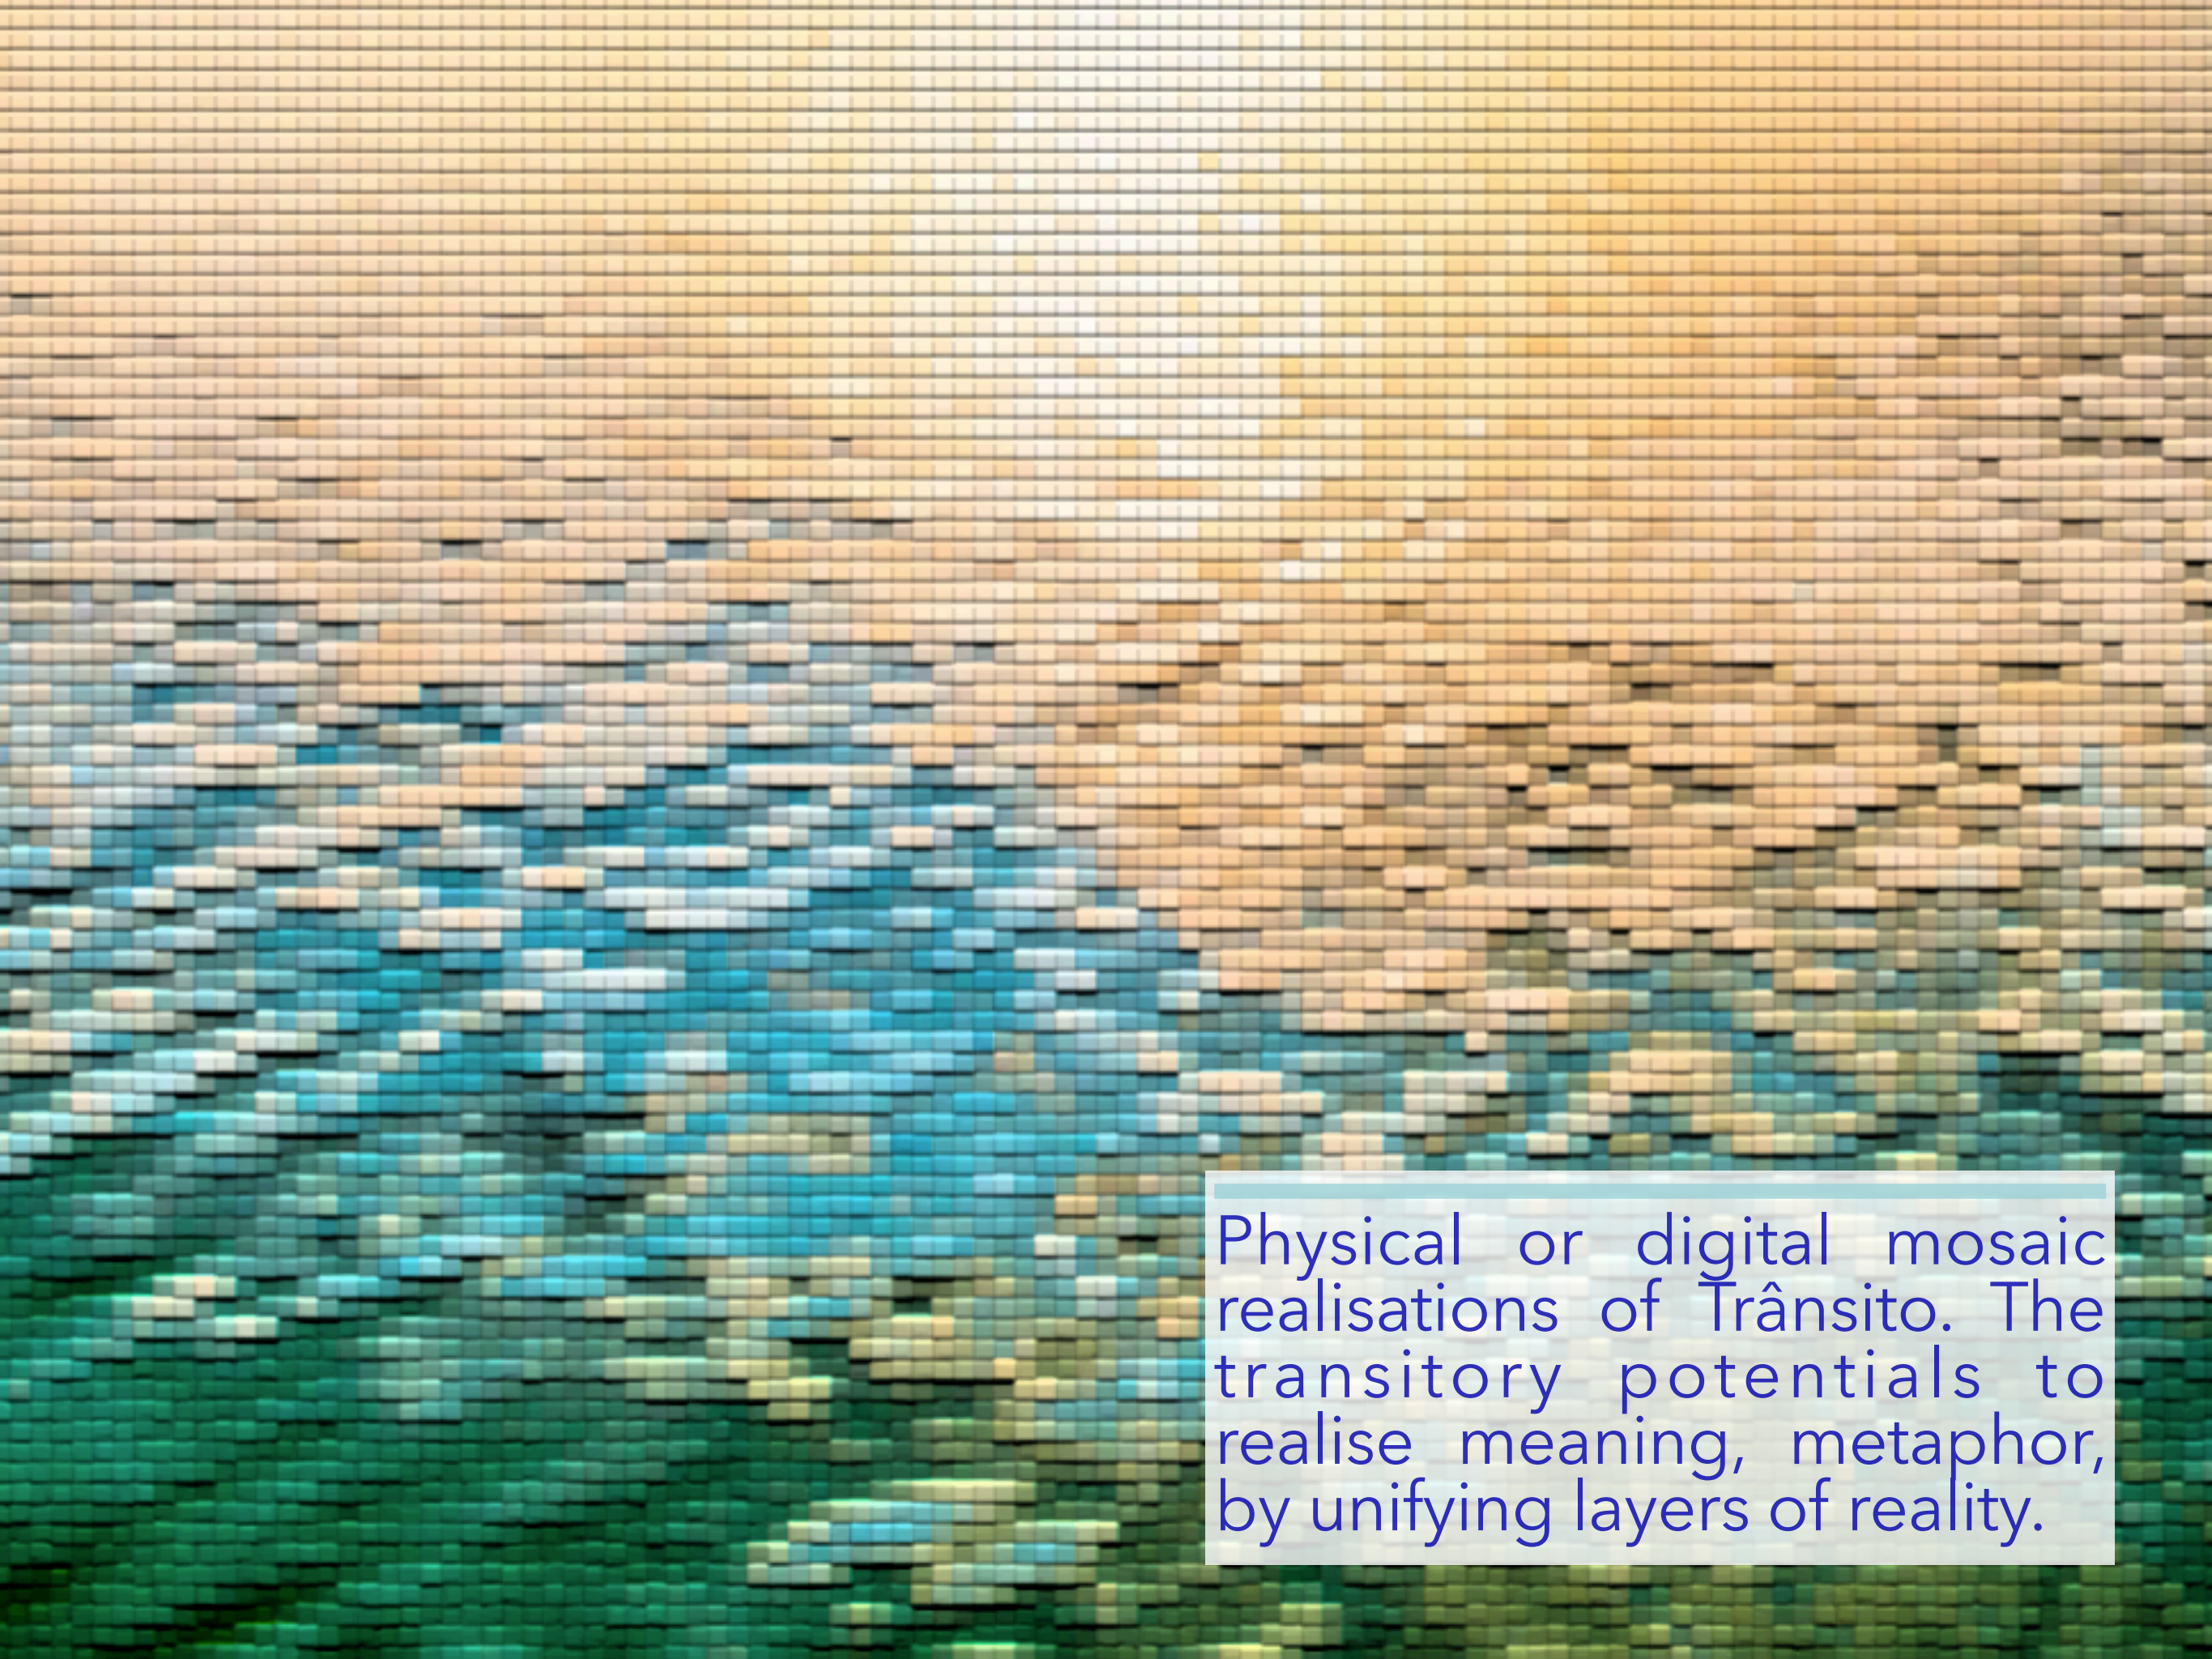

The vision of oil and water reminds viewers of the humbling labor precision knowledge teams work with to realise goals in the future. Trânsito art provides a backdrop and opportunity to highlight important histories and valuable details dedicated experts have to offer. Facts are practical and inspire innovation. Instead of being drowned by a sea of radical activists, the Trânsito art sparks conversations with appreciation and accurate considerations for the contexts of creating ideal results in balance with reality. Trânsito applied to kinetic or still facades, screens, products, wrapping, the artwork becomes an imaginary force of nature, deepened by multi-layered technologies used to cultivate and deepen our collective potential and responsibilities.

Viewers feel movement while looking at still images. Images can be animated, or made into mosaics or textiles.

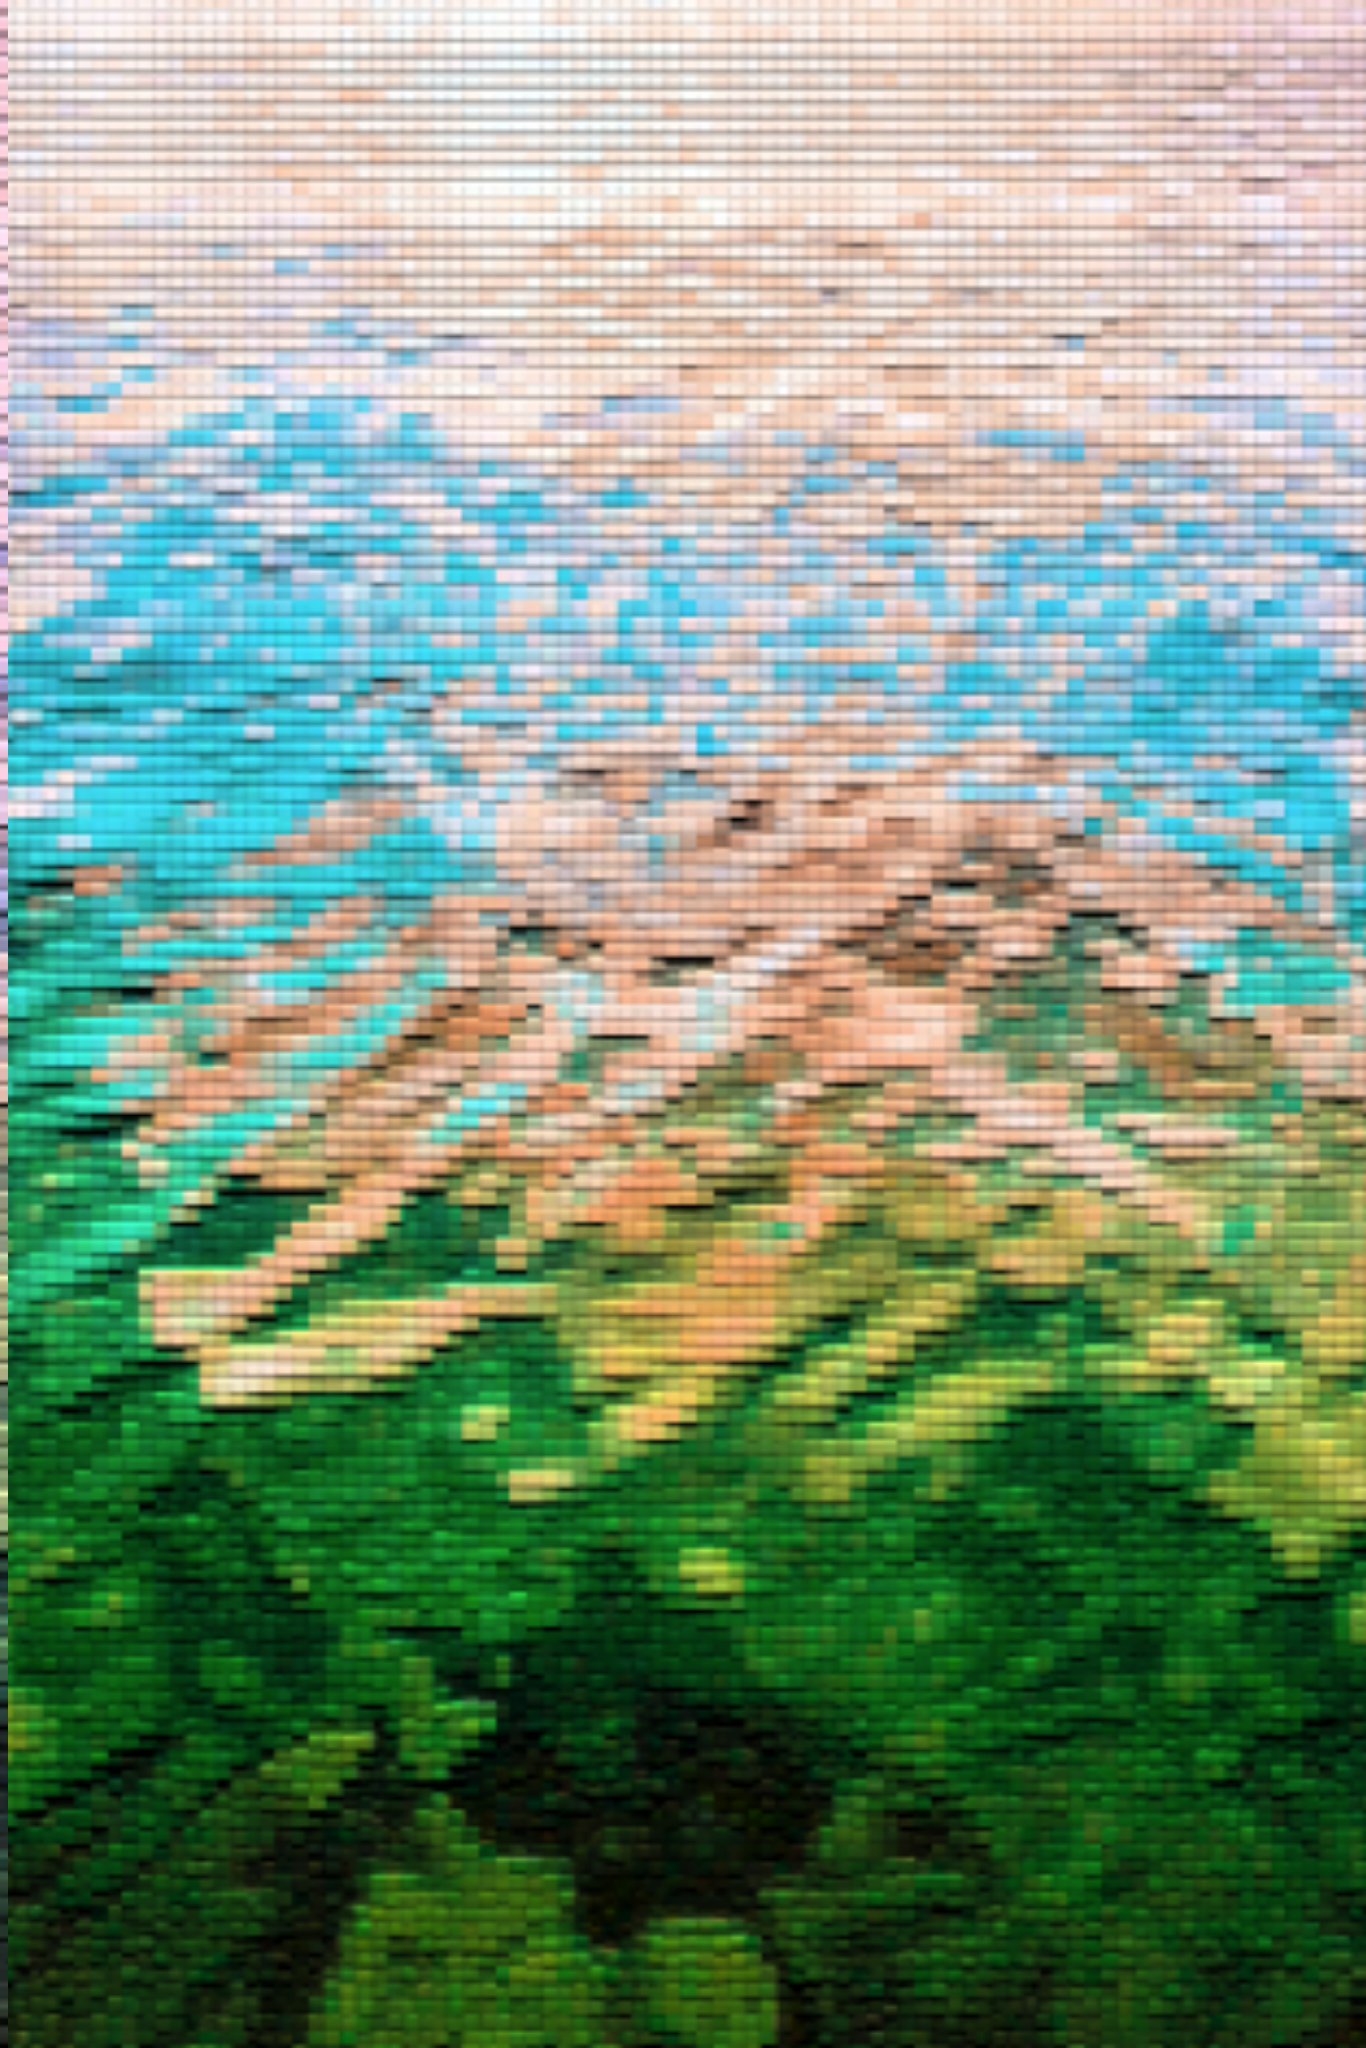

Scientific studies suggest visual rest in art improves concentration and health.

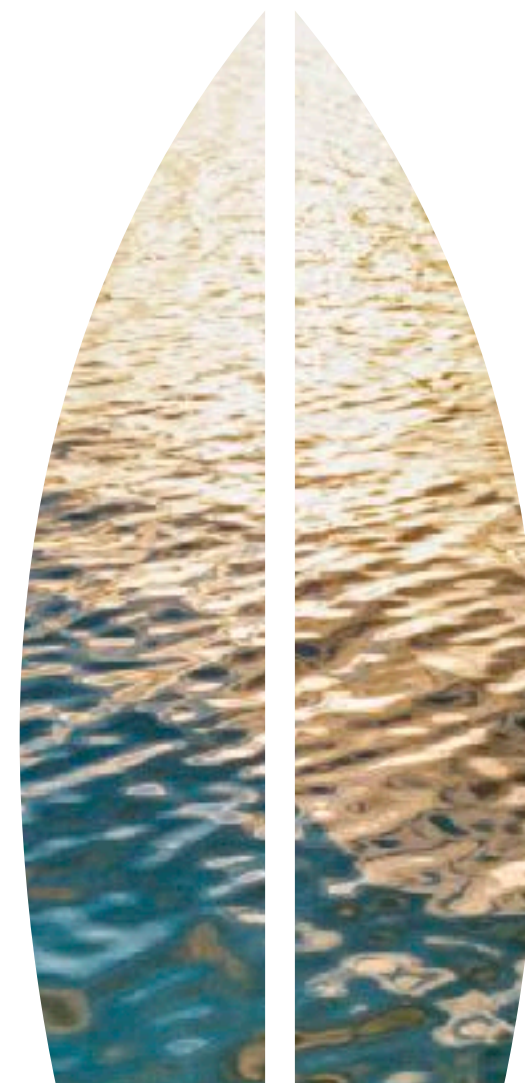

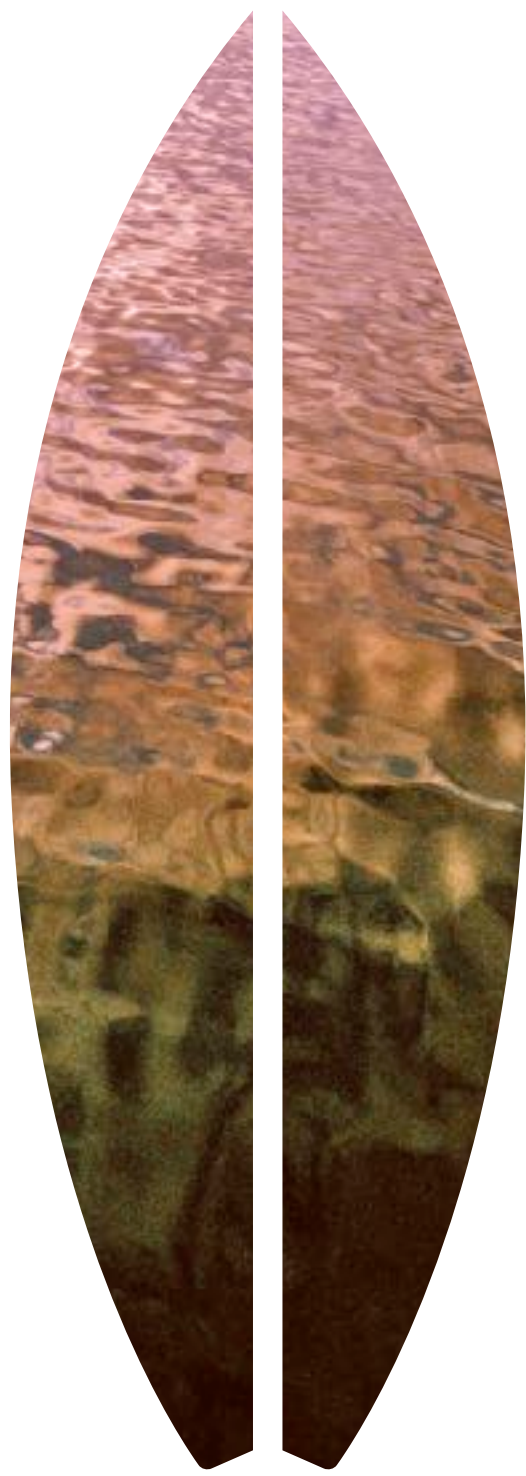

Physical or digital mosaic
realisations of Trânsito. The
transitory potentials to
realise meaning, metaphor,
by unifying layers of reality.

Virtual rendering of exterior facade application. Interior facades can be realized.

Applications to free time activity and sports such as SUP, biking, ski, boating, swimming, and cars encourage healthy activity and community.

Technological advances in printing allow Trânsito application to all products, including housewares, clothing, tech, cars and travel.

MARI AMMAN

GLOBAL ARTIST, RESEARCHER & DESIGNER

Effectively getting along and working with scientists, architects, builders, engineers, musicians, academics, authors, marketers, athletes and performers while confusing artists since 1999.

TRÂNSITO

Oil & Water & The Imaginary Realm

Relationships with human vision, water, and oil inspire harmony in conversations on resources and technology. Iridescent reflections are transformed into a gentle sense of serenity. The cross processes of analogue and digital technologies bridge fantasy and reality through the sublime. The images can be cropped, drum roll scanned and adapted to interiors and exteriors, public and private installations, transportation, sport, and product applications.
